

The Congress of Deputies urges the Government to:

1. Recognize Palestine as a State, subject to international law, with the conviction that only through the coexistence of two States, Israel and Palestine, can accords be reached through dialogue and negotiations that would guarantee peace and security for both, respect for the rights of their citizens and regional stability.
2. Promote in coordination with the European Union recognition of the Palestinian state as a sovereign, contiguous, democratic and independent State, living in peace and security side by side with Israel.
